

Aspire Payroll Management

POWERED BY INTEGRATED PAYROLL SERVICES (IPS)

Save time and money by automating labor-intensive payroll processes with a fully integrated, flexible payroll solution.

Aspire's Payroll Management integration enables employers to seamlessly sync employee time and payroll information between Aspire and the IPS 360° Payroll system.

Now you'll no longer have to maintain employee data in your HR/payroll system and the Aspire platform,

not only eliminating the need for time-consuming duplicate data entry but also reducing potential inconsistencies and errors.

Even better, IPS provides the same functionality—and more—as their primary competitors at a lower cost without annual price increases!

Gain substantial value beyond easing the burden of payroll processing.

Seamlessly export payroll transactions to your accounting system.

After processing your payroll in IPS 360° Payroll, simply book the transactions in your accounting system. IPS offers pre-defined integrations with QuickBooks and Accumata, the two most commonly used accountings systems used by Aspire clients.

Easily manage workers' comp reporting.

When you capture the workers' comp costs down to the service level in Aspire, the IPS 360° Payroll system will automatically apply the correct rates by code, so you always have an accurate view of your payroll-by-payroll workers' comp costs.

Expand your system beyond payroll with valuable HR functionality.

The IPS 360° Payroll system is designed to grow and evolve with your company by offering additional HR functionality, including applicant tracking, electronic employee onboarding, electronic benefits enrollment, and time-off requests and approval. The system syncs employee changes, such as new hires, terminations, and updates, to Aspire every 30 minutes.

Take advantage of other valuable services.

IPS and Aspire have pioneered the industry's first turn-key early-wage access program, Aspire Pay OnDemand, enabling you to offer your employees instant access to a percentage of their earned wages as time is approved in Aspire. And IPS and Aspire continue to explore ways to provide innovation and value to our mutual clients.

Enjoy hassle-free implementation and support.

The IPS 360° Payroll system can import employee information and payroll history from most payroll systems, significantly reducing the time commitment and challenges of implementing a new solution.

Beyond implementation, the IPS team is trained on the Aspire platform and can troubleshoot level 1 payroll issues, eliminating the need to reach out to multiple touch points for payroll-related support.
