

# Aspire Integrated Purchasing

POWERED BY LANDSCAPEHUB

**Streamline ordering and maximize savings** with access to LandscapeHub's order management system in Aspire.

Order placement is a challenging and cumbersome process that often requires landscape companies to manually source from multiple vendors—even when purchasing materials for a single project.

Fortunately, Aspire and LandscapeHub have joined forces to combine the power of the Aspire platform with the convenience of the LandscapeHub order management system.

This valuable, time-saving integration will enable you to seamlessly build quotes and place orders with LandscapeHub in the Aspire platform.

*Even better*—as this partnership grows so, too, will the technology. Future phases will include the ability to view item pricing as well as direct order placement with LandscapeHub—all from within the Aspire platform.

## **Quickly and conveniently source the correct materials in one place.**

Simply submit your estimated order created in Aspire with a single click. LandscapeHub's system matches your material needs to suppliers within their nationwide network in closest proximity to your zip code, eliminating the challenge of placing separate orders with multiple vendors.

With access to the world's largest searchable plant database and the ability to view results by relevance, location, supplier name, and most updated inventory, you can have confidence in finding what you need from vetted, quality suppliers.

## **Help shape the future of this valuable, time-saving integration.**

**Want to contribute to the expansion of this partnership?** Your feedback will not only help us improve the efficiency of the integration but also ensure that your current and future needs are met.

**Simply contact your dedicated client success manager (CSM) to participate.**
